| Date | 03 November 2022 |
| Team ID | PNT2022TMID29949 |
| Project Name | Personal Expense Tracker App |

The screenshot shows the Visual Studio Code interface with a Python file named `app.py` open. The code defines a Flask application with a single route `/` that returns the name 'Chandru'. The left sidebar contains the Explorer, Search, and Run and Debug views. The bottom panel shows the Terminal with PowerShell commands for environment setup and the Flask application running on `http://127.0.0.1:5000/`. The status bar at the bottom indicates the Python version is 3.9.12 (env: venv).

```
app.py
1 from flask import Flask
2 app = Flask(__name__)
3
4 @app.route('/')
5 def index():
6     return 'Chandru'
7
```

Terminal Output:

```
