ACKNOWLEDGEMENT

It is one of the most efficient tasks in life to choose the appropriate words to express one's gratitude to the beneficiaries. We are very much grateful to God who helped us all the way through the project and how moulded us into what we are today.

We are grateful to our beloved Principal **Dr.S. CHITRA, M.E., Ph.D.**, College of, at Perumal Manimekalai College of Engineering ,Hosur for providing the opportunity to do this work in premises.

We acknowledge our heartfelt gratitude to **Dr.Madhusudhan M.E., Ph.D**, Professor and Head of the Department, Department of Computer Science and Engineering, at Perumal Manimekalai College of Engineering ,Hosur, for her guidance and valuable suggestions and encouragement throughout this project.

We are highly indebted to **Mrs.SSindhuja,M.E.** Professor, Department of Computer Science and Engineering,at Perumal Manimekalai College of Engineering ,Hosur, whose immense support, encouragement and valuable guidance made us to complete this project successfully.

We also extent our thanks to Project Coordinator and all Staff Members for their support in complete this project successfully.

Finally, we would like to thank to our parents, without their motivational and support would not have been possible for us to complete this project successfully.

CHAPTER 1

INTRODUCTION

Personal Expense Tracker System is designed to keep a track of Income-Expense of an organisation on a day-to-day basis. This System divides the Income based on personal expenses. If exceed day's expense, system will calculate income and will provide new daily expense allowed amount. Personal expense tracking System will generate report at the end of month to show Income-Expense graph. And employees send reports to the manager for verification. Manager send final reports to administrator. Based on the final reports system predict the next month expense . It will helps to manage over all expense and income. Businesses utilize expense management software to process, pay, and audit employee-initiated expenses. The software includes capabilities for employees to input expenses for approval through a forms. Expense management software simplifies and automates a business' expense entry, eliminates paper trail, and reduces administrative effort. Expense management software allows administrators to have full visibility of and track employee use of business financial resources. Expense management software analyzes overall expenses, identifies cost-saving opportunities, and controls excessive spending. "Expense Tracker" is developed to manage the dpersonal expenses in a more efficient and manageable way. By using this application. we can reduce the manual calculations of the daily expenses and keep track of the expenditure.

1.1 Abstract

The web application "Personal Expense Tracker" is developed to manage the daily expenses in a more efficient and manageable way. By using this application we can reduce the manual

calculations of the daily expenses and keep track of the expenditure. In this application, user can provide his income to calculate his total expenses per day and these results will be stored for each user. The application has the provision to predict the income and expense for the manager using data mining. In this application people can manage and limit their expenses.

1.2 Purpose

- Also known as expense manager and money manager, an expense tracker is a software or application that **helps to keep an accurate record of your money inflow and outflow**. Many people in India live on a fixed income, and they find that towards the end of the month they don't have sufficient money to meet their needs.
- When you track your spending, **you know where your money goes and you can ensure that your money is used wisely**. Tracking your expenditures also allows you to understand why you're in debt and how you got there. This will then help you design a befitting strategy of getting out of debt
- An expense is **a cost that businesses incur in running their operations**. Expenses include wages, salaries, maintenance, rent, and depreciation. Expenses are deducted from revenue to arrive at profits. Businesses are allowed to deduct certain expenses from taxes to help alleviate the tax burden and bulk up profits.
- An expense report contains a categorized and itemized list of expenses that were made on behalf of the organization. This report **helps the employer or finance team determine what money was spent, what was purchased, and how much of the expenditure is approved for reimbursement**.

CHAPTER 2

LITERATURE SURVEY

2.1 Existing problem

- **How it Actually Works**

In existing, we need to maintain the Excel sheets, CSV etc. files for the user daily and monthly expenses. In existing, there is no as such complete solution to keep a track of its daily expenditure easily. To do so a person has to keep a log in a diary or in a computer, also all the calculations need to be done by the user which may sometimes result in errors leading to losses.

- **Drawbacks of the Existing System**

There can be many disadvantages of using a manual accounting system. Accounting, for any business, can be a complex undertaking. A manual accounting system requires you to understand

the accounting process in a way that may be unnecessary with a computerized accounting system. This can be an advantage or a disadvantage, depending on the person doing the bookkeeping; often, a specially trained professional is needed to ensure that accounting is done properly. Unraveling the complexity of your financial records by hand may be time consuming. Since it takes time to generate reports.

2.2 References

App Name: Spendee (Reference From IBM) (Released on 13.11.2013)

Spendee is a free money tracker app for budget planning and money management. It is useful to someone who just wants to track daily expenses, instead of being confused by the complicated expenses book keeping.

Platform to help you make more educated decisions.

Budget App–Expense Tracker (Released on 04.05.2020)

Budget app is a expense tracker app which tracks and records your **expenses** with a help of a balance calculator.

Wallet: Budget Expense Tracker:(Released on 21.4.2011)

Wallet is all-in-one personal finance app which has features of budget planner, bill manager, and money saver in it.

Expense Tracker:(Released on 2022)

Daily Expense Tracker System is designed to keep a track of Income-Expense of an organisation on a day-to-day basis. This System divides the Income based on daily expenses. If exceed day's expense, system will calculate income and will provide new daily expense allowed amount

Online Income and Expense Tracker:(Released on 2019)

It is a web application which is helpful to manage out income and expense as a daily or periodically or else whenever we want to remind and acts as an indicator or reminder example in the fastest world which we can't able to remember what are the things we have to do for the end of month and what are the payments we have to pay for the particular month.

Student Expense Tracker:(Releasedon2022)

This is an android application which is used to track the daily expense of a student. It is like a digital diary that keeps record of expenses done by student. The application keeps track of money spent and the earnings both of the student on day-to-day basis. It also has the feature that it gives warning messages if we are exceeding on our expenses and hence, we can limit our expenses and avoid overspending. If you spend less money than the daily expense allowed amount, the money left after spending is added into user's savings.

2.3 Problem Statement Definition

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	I'm trying to	But	Because	Which makes me feel
Student	Save pocket money and split expense	unable to limit my expense	I don't have a track of my expenses	Regret to save
Working professional	Achieve FIRE(Financial IndependenceRetire Early)	Expense is higher than Investment	Too-Busy-To budget	FIRE goal in vain
Average Adult	organize my expenses in customized way	need to alert when the user limit exceeds	source of income and expenditure hard to keep up	inability to organize the sources

CHAPTER3

IDEATION & PROPOSED SOLUTION

3.1 Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviors and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

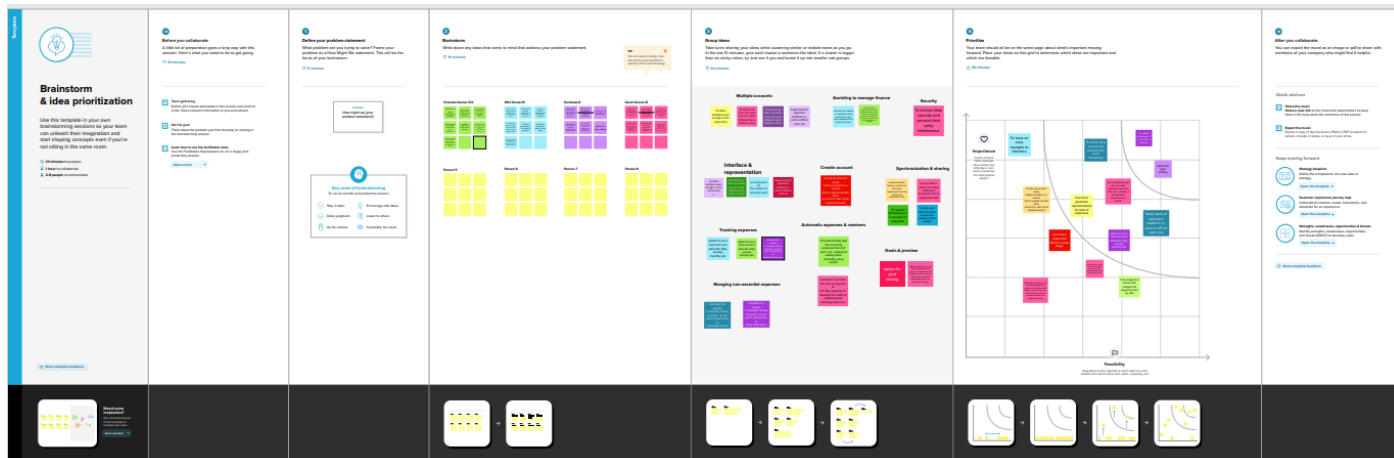

3.2 Ideation & Brainstorming:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich number of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

3.3 Proposed Solution:

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	It's about being aware of expenses in day-to-day life. Often people lose track of where and how much was spent in the long run, ultimately have to live while sustaining the little money they have left for their essential needs. There is a need for people to track and monitor their expense regularly and doing this through paper and pen or in excel is not that completely feasible.
2.	Idea / Solution description	The main idea is to enable users to set limits for their Expenses and Alert them through Mail When the Limit Exceeds.
3.	Novelty / Uniqueness	Detailed analyses of what and how the user spends, and all the spending habits can be tracked and accordingly adjusted. The weekly, monthly, and year-wise comparison of expenditures will be and will let the user know through Alerts When the limit exceeds . When you track your expenses, you are taking control of your finances. It lets you regulate spending impulses and eliminate worthless spending, thereby avoiding debt. At every point, you will be aware about how much money you are left with.

4.	Social Impact / Customer Satisfaction	It can help you to * Track and prioritize spending * Avoid unnecessary spending habits *Take Control of your Finances
5.	Business Model (Revenue Model)	Through our application the revenue for the company will be in the form of subscription plans. Makes the user know about what are all the good things and trending ways to invest money safely and securely.
6.	Scalability of the Solution	The system can handle a large number of users since it is based on the cloud system. It is very easy to store and retrieve data from the cloud rather than getting it from a database.

3.4 Problem Solution fit:

Problem – Solution Fit Template: The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer’s problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behaviour.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem behaviour fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ Understand the existing situation in order to improve it for your target group.

Project Title : Personal Expense Tracker Application		Problem -Solution Fit Template		Team ID: PNT2022TMI29949	
Define CS, fit into CC	1. CUSTOMER SEGMENT(S) <small>Who is your customer? i.e. working parents of 0-5 y.o. kids</small> CS	6. CUSTOMER CONSTRAINTS <small>What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connections, available devices</small> CC	5. AVAILABLE SOLUTIONS <small>Which solutions are available to the customers when they face the problem? Or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital accounting</small> AS	Explore AS, differentiate	
	Customers use different methods to track their income and expense by using paper and pen, spreadsheets and budgeting apps	This constraints that the customer face while using this application is used in a low cost and easy way.	The solution which we have proposed are if the expense exceeded than specified limit, the application will show you an alert message		
Focus on J&P, fit into RC	2. JOBS-TO-BE-DONE / PROBLEMS <small>Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one, explore different sides.</small> J&P	9. PROBLEM ROOT CAUSE <small>What is the real reason that this problem exists? What is the back story behind the need to do this job? i.e. customers have to do it because of the change in regulations</small> RC	7. BEHAVIOUR <small>How does your customer do to address the problem and get the job done? (If already related, find the right water panel installer, calculate usage and benefits, indirectly associated, customers spend less time on volunteering work (in Greenpeace))</small> BE	Focus on BE, fit into RC, understand RC	
	Customers can able to track their income and expenses easily	Due to unawareness there is no right on software so that the customer finds hard to track their expense	They can able to make decision whether they can avoid some unwanted expenses.		
Identify strong TR & EM	3. TRIGGERS Some of the triggers are advertised in the television for the information of the experts.	10. YOUR SOLUTION This application tracks your every expenses anywhere and anytime without using the paper work. Just click and enter your expenditure. To avoid data loss, quick settlements and reduce human error.	8. CHANNELS of BEHAVIOUR 8.1 ONLINE With the help of various online channel customers track their expenses regularly.	Identify strong TR & EM	
	4. EMOTIONS: BEFORE / AFTER With traditional tracker system customers find difficult to track their expenses but after using personal expense they their expense easily		8.2 OFFLINE Personal Expense Tracker Application enables customers to reduce spending their expenses for unwanted things		

CHAPTER 4

REQUIREMENT ANALYSIS

4.1 Functional requirement:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Form for collecting details
FR-2	Login	Enter username and password
FR-3	Calendar	Personal expense tracker application must allow user to add the data to their expenses.
FR-4	Expense Tracker	This application will send alert message to the user if the limit exceeds.
FR-5	Report generation	The monthly report for the budgets will be sent through mail
FR-6	Category	This application shall allow users to add categories of their expenses.

4.2 Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

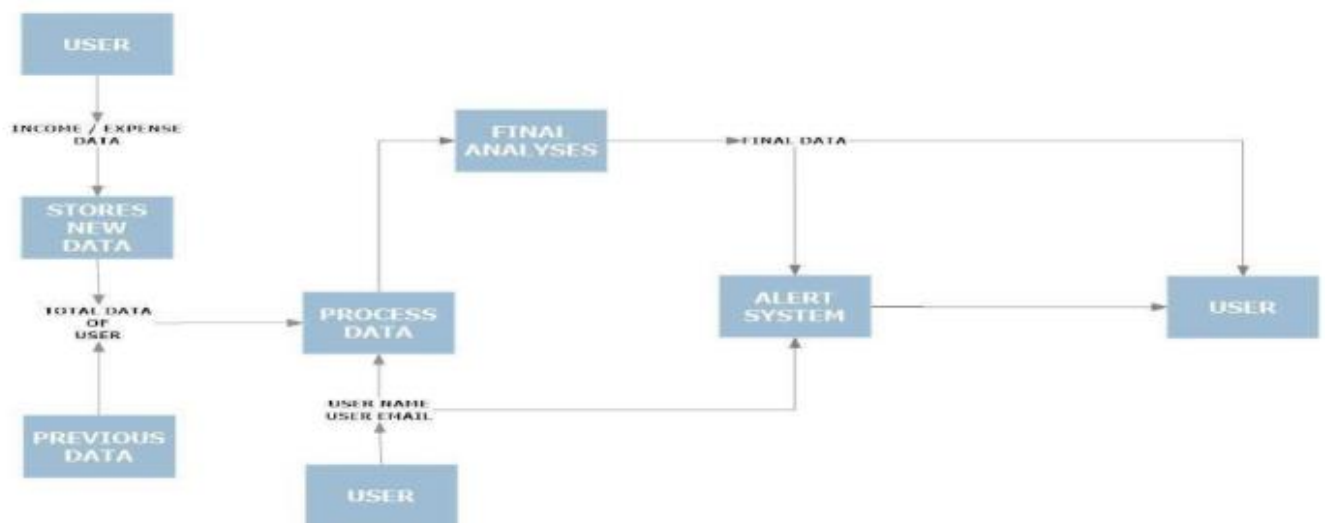

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Helps to keep an accurate record of your income and expenses.
NFR-2	Security	Budget tracking apps are considered very safe from those who commit cyber crimes.
NFR-3	Reliability	Each data record is stored on a well built efficient database schema. There is no risk of data loss.
NFR-4	Performance	The types of expense are categories along with an option. Throughput of the system is increased due to light weight database support.
NFR-5	Availability	The application must have a 100% up-time.
NFR-6	Scalability	The ability to appropriately handle increasing demands.

CHAPTER 5

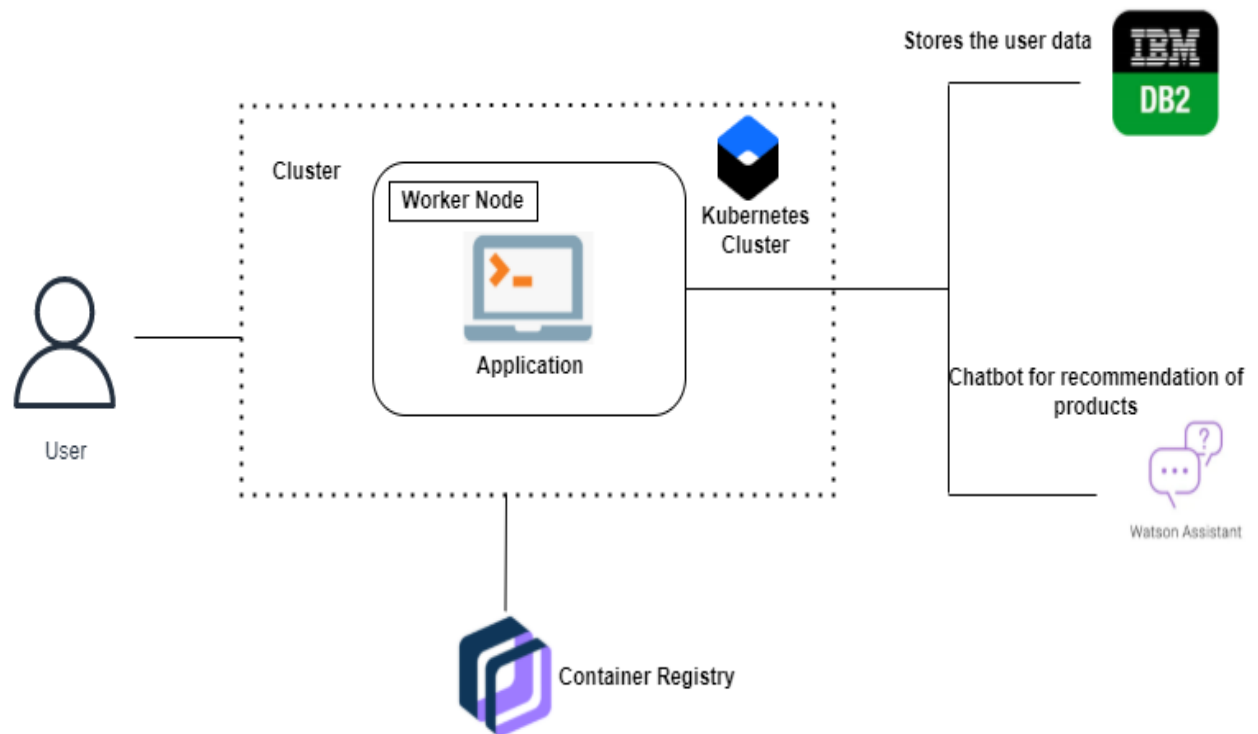

PROJECT DESIGN

5.1 Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can graphically depict the right amount of the system requirement. It shows how data enters and leaves the system, what changes the information, and where data is stored.

5.2 Solution & Technical Architecture

5.3 User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user & web user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	
		USN- 3	As a user, I can register for the application through Google	I can register & access the dashboard with Google Login	Low	
	Login	USN - 4	As a user, I can log into the application by entering email & password	I can access the application	High	
	Dashboard	USN - 5	As a user I can enter my income and expenditure details.	I can view my daily expenses	High	
Customer Care Executive		USN – 6	As a customer care executive I can solve the log in issues and other issues of the application.	I can provide support or solution at any time 24*7	Medium	
Administrator	Application	USN - 7	As a administrator I can upgrade or update the application.	I can fix the bug which arises for the customers and users of the application	Medium	

CHAPTER 6

PROJECT PLANNING & SCHEDULING

6.1 Sprint Planning & Estimation:

Use the below template to create product backlog and sprint schedule

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	3 November 2022
Team ID	PNT2022TMID29949
Project Name	Personal Expense Tracker Application
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Setting the required environment	USN-1	Gathering information for the user .	2	High	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-1		USN-2	Creating account in ibm cloud,docker,kubernetes.	1	High	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-1		USN-3	Creating container registry.	2	High	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-1		USN-4	Creating the ibm db 2 to store the data of the user.	2	Medium	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-1		USN-5	Creating simple flask application .	1	Low	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-2	Login	USN-6	As a user, I can log into the application by entering email & password	2	High	Chandra kumar D.K Nikil kumar R

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
						Sandeep G Karankumar B
Sprint-2		USN-7	As a user, I can log into the application by entering GMAIL.	2	Medium	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-2		USN-8	As a user, I can log into the application by entering facebook.	1	Low	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-2	Mail confirmation	USN-9	As a user, I will receive confirmation mail once I logged into it.	2	High	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-2		USN-10	As a user, I can log into application by entering my login credentials.	2	High	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-3	Local host	USN-11	Deploying my application in my local host by setting up the system environment.	2	High	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B
Sprint-4	IBM cloud	USN-12	Deploying my application in the ibm cloud by setting up the cloud environment.	2	High	Chandra Kumar D.K Nikil kumar R Sandeep G Karan kumar B

6.2 Sprint Delivery Schedule:

ProjectTracker, Velocity:

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	20	05 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	20	2 Nov 2022
Sprint-4	20	6 Days	13 Nov 2022	19 Nov 2022	20	19 Nov 2022

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

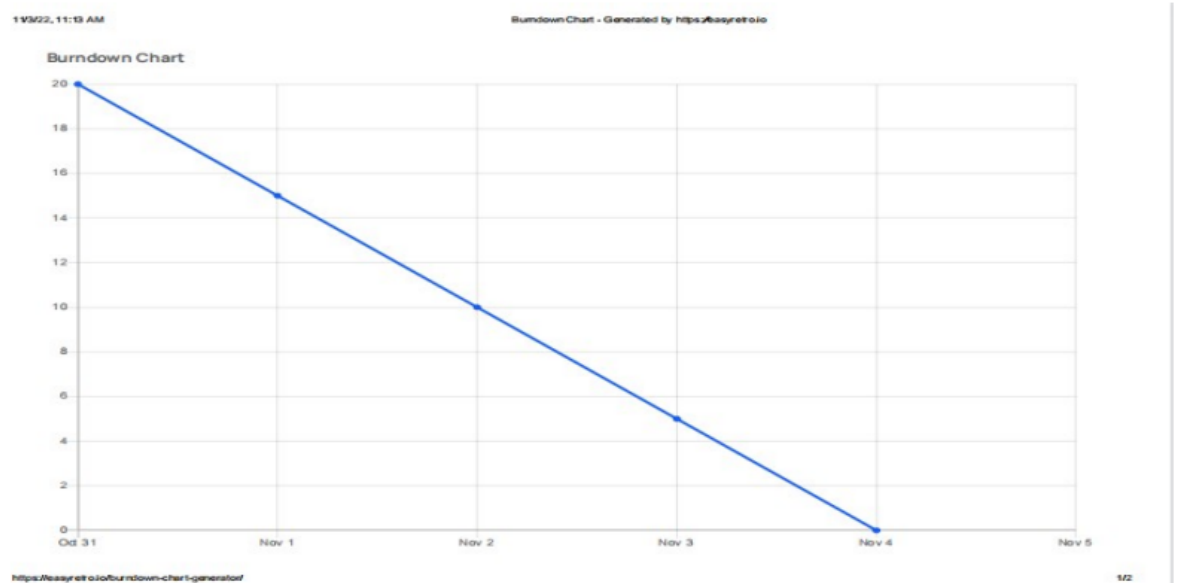

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

CHAPTER 8

TESTING

8.1 User Acceptance Testing

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Personal Expense Tracker Application project at the time of the release to User Acceptance Testing (UAT).

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved .

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	10	5	2	3	20
Duplicate	1	0	3	0	4
External	2	3	0	1	6

	Fixed	11	2	4	20	37
	Not Reproduced	0	0	0	0	0
	Skipped	0	0	0	0	0
Outsource Shipping			6	0	0	6
Exception Reporting			7	0	0	2
Final Report Output			5	0	0	5
Version Control			1	0	0	1
	Won't Fix	0	5	2	1	8
Totals		24	14	13	26	75

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested.

Section	Total Cases	Not Tested	Fail	Pass
Print Engine	7	0	0	7
Client Application	29	0	0	29
Security	4	0	0	4

CHAPTER 9

PERFORMANCE METRICS

- **Tracking income and expenses:** Monitoring the income and tracking all expenditures (through bank accounts, mobile wallets, and credit & debitcards).
- **Transaction Receipts:** Capture and organize your payment receipts tokeep track of your expenditure.
- **Organizing Taxes:** Import your documents to the expense tracking app,and it will streamline your income and expenses under the appropriate tax categories.
- **Payments & Invoices:** Accept and pay from credit cards, debit cards, netbanking, mobile wallets, and bank transfers, and track the status of yourinvoices and bills in the mobile app itself. Also, the tracking app sends reminders for payments and automatically matches the payments with invoices.
- **Reports:** The expense tracking app generates and sends reports to give adetailed insight about profits, losses, budgets, income, balance sheets, etc.,
- **E-commerce integration:** Integrate your expense tracking app with youreCommerce store and track your sales through payments received via multiple payment methods.
- **Vendors and Contractors:** Manage and track all the payments to thevendors and contractors added to the mobile app.
- **Access control:** Increase your team productivity by providing access control to particular users through custom permissions.
- **Track Projects:** Determine project profitability by tracking lab or costs, payroll, expenses, etc., of your ongoing project.

- Inventory tracking: An expense tracking app can do it all. Right from tracking products or the cost of goods, sending alert notifications when the product is running out of stock or the product is not selling, to purchase orders.
- In-depth insights and analytics: Provides in-built tools to generate reports with easy-to-understand visuals and graphics to gain insights about the performance of your business.
- Recurrent Expenses: Rely on your budgeting app to track, streamline, and automate all the recurrent expenses and remind you on a timely basis.

CHAPTER 10

ADVANTAGES & DISADVANTAGES

ADVANTAGES :

- You will spend mindfully.
- Making financial control.
- Identify problem areas.
- Make a better budget.
- Tracking your financial progress.
- Keeping finances organized.
- Improving financial security.
- Encourages and increases savings.

DISADVANTAGES :

- Determining the right process.
- Feeling constrained.
- Spending more than necessary.
- Finding the time for it.
- Making the right decisions.
- Impacting how employees feel.
- Overlooking important factors.
- Having top-level employees do all the planning.

CHAPTER 11

CONCLUSION

The new system has overcome most of the limitations of the existing system and works according to the design specification given. The project what we have developed is work more efficient than the other income and expense tracker. The project successfully avoids the manual calculation for avoiding calculating the income and expense per month. The modules are developed with efficient and also in an attractive manner. The developed systems dispense the problem and meet the needs of by providing reliable and comprehensive information. All the requirements projected by the user have been met by the system. The newly developed system consumes less processing time and all the details are updated and processed immediately. Since the screen provides online help messages and is very userfriendly any user will get familiarized with its usage. Module s are designed to be highly flexible so that any failure requirements can be easily added to the modules without facing many problems. The best organizations have a way of tracking and handling these reimbursements. This ideal practice guarantees that the expenses tracked are accurately and in a timely manner. From a company perspective, timely settlements of these expenses when tracked well will certainly boost your employees' morale

- Quickly Determine How Profitable Business Is
- Effective expense tracking and reporting to avoid conflict

CHAPTER 12

FUTURE SCOPE

The project assists well to record the income and expenses in general. However, this project has some limitations:

- The application is unable to maintain the backup of data once it is uninstalled.
- This application does not provide higher decision capability.

To further enhance the capability of this application, we recommend the following features to be incorporated into the system:

- Multiple language interface.
- Provide backup and recovery of data.
- Provide better user interface for user.
- Mobile apps advantage.
