## Project Design Phase-II Technology Stack (Architecture & Stack)

Date	18 October 2022
Team ID	PNT2022TMID29949
Project Name	Project – Personal Expense Tracker
Maximum Marks	4 Marks

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

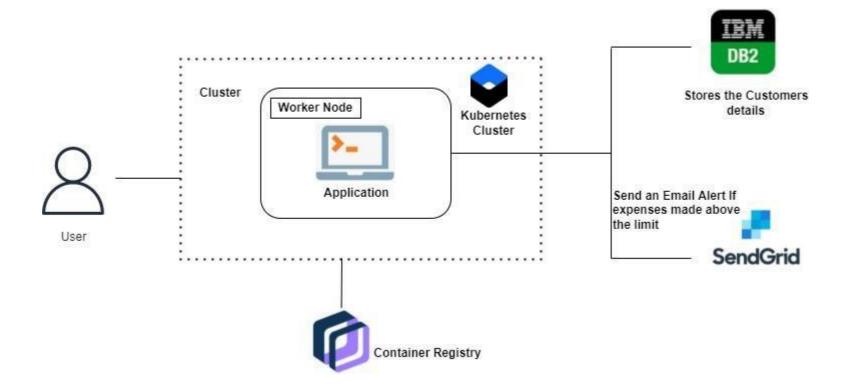

Table-1: Components & Technologies:

S.No.	Component	Description	Technology
1.	User Interface	The user can get a Clean and responsive UI	HTML, CSS, JavaScript /Angular Js /
		to Interact with client using Web UI	React Js etc.
2.	Application Logic-1	The application contains the sign	Python
		in/sign up where the user will logininto the main	
		dashboard	
3.	Application Logic-2	Dashboard contains the fields like	IBM Watson STT service
		Add income, Add Expenses, SaveMoney	
		The reconstill got the game and got in the	IDM Waters
4.	Application Logic-3	The user will get the expense report in the graph form and also	IBM Watson Assistant,SendGrid
		get alerts if the expense limitexceeds	
5.	Database	The Income and Expense data are	MySQL, NoSQL, etc.
		stored in the MySQL database	
6.	Cloud Database	With use of Database Service on	IBM DB2, IBM Cloudantetc.
		Cloud, the User data are stored ina well secured	
		Manner	
7.	File Storage	IBM Block Storage used to storethe Financial data of the user	IBM Block Storage or OtherStorage
		of the user	Service or Local Filesystem

## **Table-2: Application Characteristics:**

S.No.	Characteristics	Description	Technology
1.	Open-Source Frameworks	Flask Framework in Python is used to implement this Application	Python-Flask
2.	Security Implementations	This Application Provides high security to the user Financial data.It can be done by using the Container Registry in IBM cloud	Container Registry, Kubernetes Cluster
3.	Scalable Architecture	Expense Tracker is a life time access supplication. It's demand will increase when the user'sincome are high	Container Registry, Kubernetes Cluster
4.	Availability	This application will be available to the user at any part of time	Container Registry, Kubernetes Cluster
5.	Performance	The performance will be high because there will be no networktraffics in the application	Kubernetes Cluster
